

WEEK-12

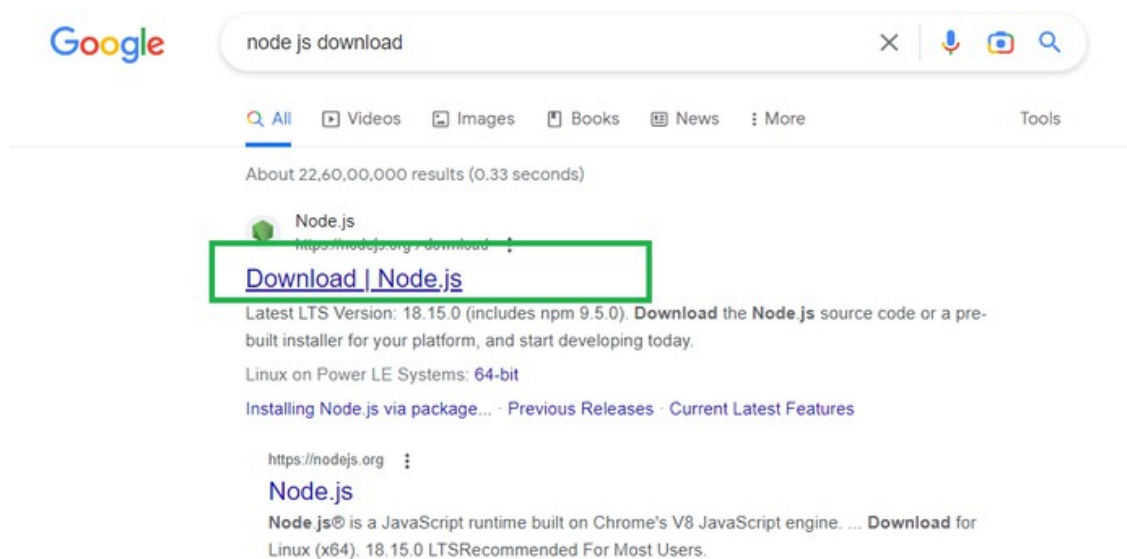

1. Downloading and Installing Node.js

Aim:

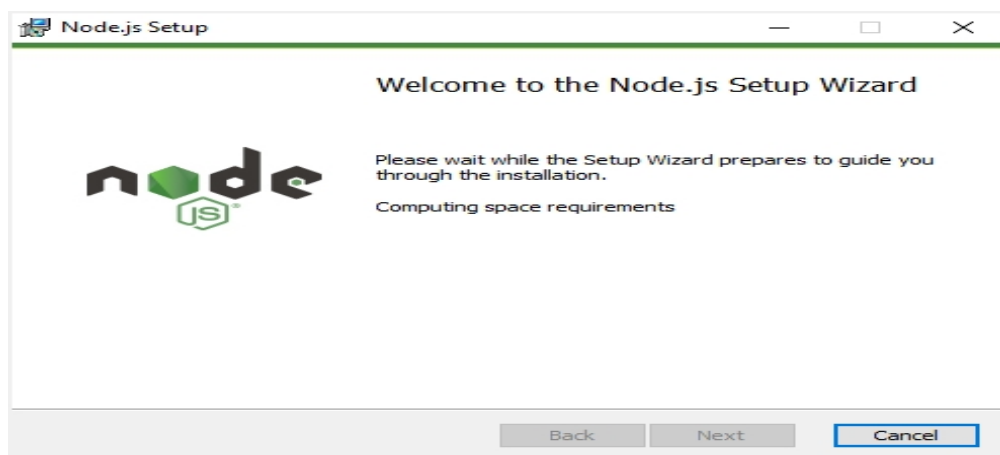

To Download and Install Node.js.

Procedure:

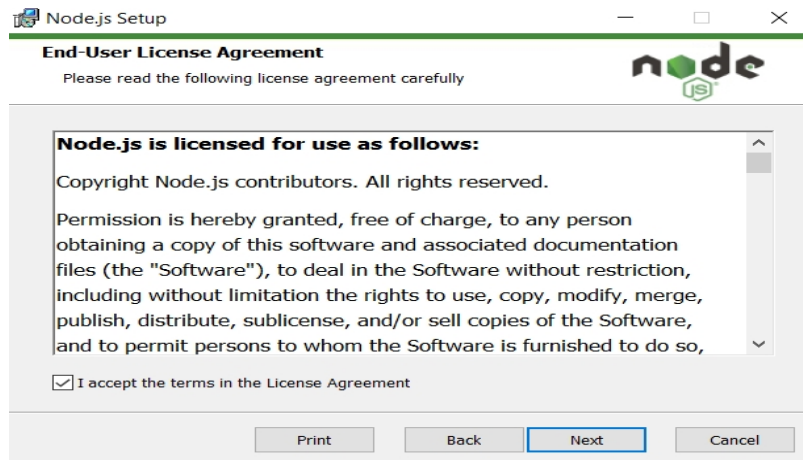

- STEP-1: Open a web browser and search for "Node.js Download" or visit the official Node.js website.

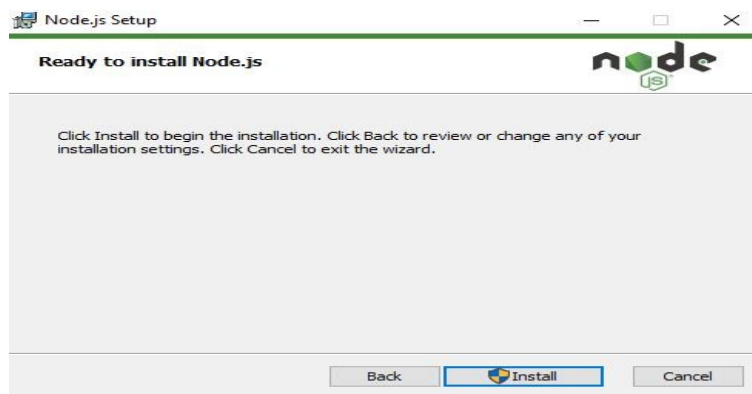

- STEP-2: Click on the Download Node.js option and download the installer suitable for your operating system.

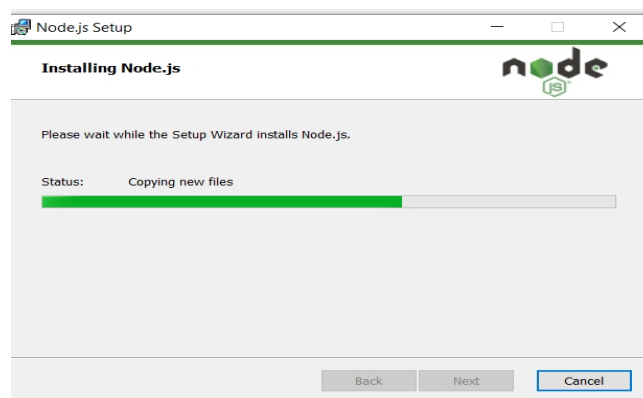

- STEP-3: Open the downloaded installer. Accept the License Agreement by checking "I accept the terms in the License Agreement" and click Next.

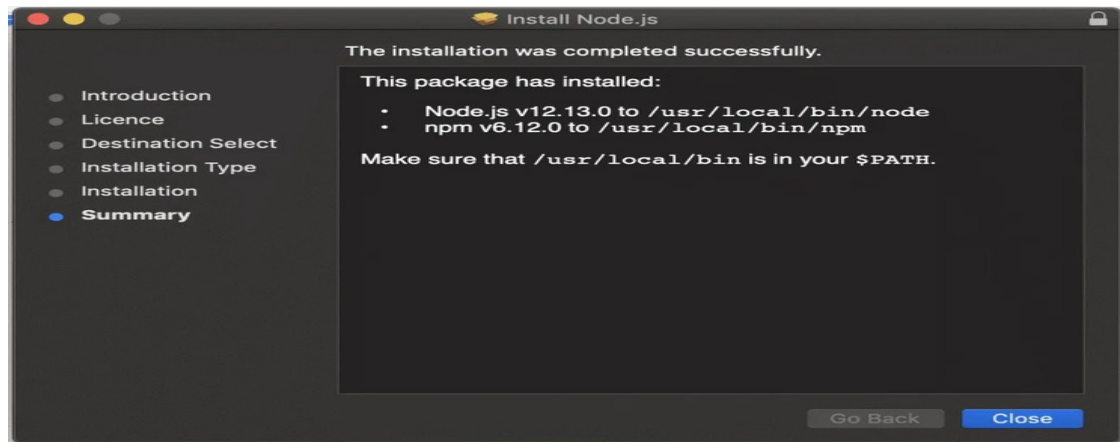

- STEP-4: Review the installation settings and click Install to begin the installation process.

- STEP-5: Wait while the setup wizard installs Node.js and copies the required files to your system.

- STEP-6: After the installation is completed successfully, click Close/Finish to exit the setup wizard. Node.js and npm are now installed and ready to use.

Result:

Node.js was successfully installed on the system and is ready for developing and running JavaScript applications.
