

WEEK-7

Aim: create a GitHub account and create a repository in it and push all the week 6 code files in it.

Procedure :

Step 1: browse for GitHub and enter it.

Step 2: login to GitHub account.

Step 3: create a repository after login by clicking new.

Step4 : specify the repository specifications.

Step6: give name and all folders onto it.

My repository link for the uid all week's work:
